## NEW WM782 SERIES

## WAVEGUIDE MIXERS

The Tektronix WM782 Series of Waveguide Mixers are a new high-performance, broadband, zero dc bias, anti-parallel dual-diode type mixers for use with the new Tektronix 2782 Spectrum Analyzer. The mixer series covers the standard waveguide bands from 26 GHz to 325 GHz. Each mixer has its own conversion loss chart on the back for easy reference.

The new WM782 mixers are of uniform size and shape, and consist of a gold-plated solid brass core with a tough protective outer shell of LEXAN plastic.
