Component & Manufacturing Engineering move to warehouse

Listed in this issue are the names, phone extensions and delivery stations of all the Component Engineering and Manufacturing Engineering people who recently moved into the new warehouse (Bldg. 78). We've also included a floor plan of the second level to help you locate these groups.

Remember, when telephoning the warehouse (from Beaverton), you must use the prefix **2 + 822 - xxxx** (consult your operator or phone directory for other prefixes).

Also please note that Technical Communications is no longer distributing **vendor data books**. That function is now being handled by the Parts Catalogs group (see map), managed by Fred Schade. For information on vendor-supplied literature stop by 78-567, or call ext. 2591.
