

COMPUTER GRAPHICS SUPPLIES CATALOG

INTRODUCTION

COLOR COPIER SUPPLIES

Now you can rely on Tektronix as your single supply source for all media, pens and ink for your Tektronix copiers, plotters, printers and storage devices. By using Tektronix-brand supplies, you can be assured of getting the best output quality for your Tek products.

All materials listed in this easy reference catalog are factory tested for compatibility with Tektronix products and are guaranteed to be of consistently high quality. Each item listing tells you which piece of Tektronix equipment it supports, the Tek part number, and the item's current price.

Over the years, Tektronix has set the standard in computer graphics. Maintaining that standard has meant continually offering superior quality products year after year.

How to Order

Simply consult this catalog for the description of the item you want. You will find listed the part number, unit quantity, and current price of the item.

Find the toll-free number for your geographic area listed on the map below. Then dial the number and place your order. Be sure to have the part number of your item(s) ready when you phone in your order. A minimum order of \$25.00 is required.

For further information, call your local Tektronix Office.

Ink and papers for the Tektronix Color Graphics Copiers have been carefully selected for optimum performance. Tektronix continually monitors paper and ink formulations to ensure bright, well-saturated colors, fast drying times and archivability.

Individual ink cartridges allow the user to replace only depleted supplies. Specially designed self-sealing cartridges permit easy replacement with no chance of ink spillage.

4691 Color Graphics Copier

Ink Cartridges

Each set of 4 cartridges contains enough ink for about 4000 typical copies (200 ml., 7 oz. per cartridge). Cartridges are sold individually.

Transparency Film

Transparency Film

Exclusive transparent film for the 4691 Color Graphics Copier produces overhead transparencies ("foils") for under \$1 per copy.

For complete satisfaction, framing transparencies as soon as they come off the copier is recommended. This avoids fingerprints and prevents curling caused by overhead projector heat.

Transparency colors are bright and vibrant for projecting line and solid-fill graphs. Black output is clear, not muddy, and especially useful for alphanumeric output.

Transparency film is dry to the touch as soon as the copy is finished, and notations can be made right on the film. Transparency output from the 4691 provides a quick, convenient source of presentation materials at a reasonable cost.

4692 Color Graphics Copier

Transparency Film (NEW)

A transparency film has been designed for the 4692. Colors are vibrant, lines sharp, and results produce a more accurate rendition of the terminal screen than previous transparency offerings have provided.

The 4692 automatically feeds up to 15 sheets of transparency film, interleaved with blank sheets of paper. Instruction sheet included in package.

For complete satisfaction, framing transparencies as soon as they come off the copier is recommended. This avoids fingerprints and prevents curling caused by overhead projector heat.

Each package contains 100 sheets.

Transparency Film

Make color overhead transparencies quickly, easily and at a fraction of the cost of traditional photographic or manual methods. This exclusive specially coated transparent film is available in sheets only.

Like the standard roll of paper, film is a full 10 inches (254 mm) wide. This eliminates the chance of printing on the platen, and easily fits into a cardboard frame.

Used with the 4695, this transparency film produces image quality sufficient for informal meetings & presentations.

Each box contains a diagram, complete instructions and 100 sheets of film.

Tektronix offers a wide assortment of plotter pens from which to choose. To simplify your selection process, pens are grouped according to the type of plotter for which they were made. Basically there are two groups of pens:

1) Those for Tektronix 4662 Option 31 (8-pen unit), and the 4663 Interactive Digital Plotters.

2) Those for Tektronix 4662 Interactive Digital Plotter (Standard 1-pen unit).

4663, 4662 Option 31 Interactive Digital Plotters

Note: For area-fill applications using these transparency pens, program your plotter to 4 inches-per-second speed, and select .005 spacing. Alphanumeric output and line output on film also benefits from slower pen speeds.

For longer pen life, remove all pens from turret and manually re-cap them after use.

Wet Ink Pens

Wet ink pens are similar to those used in drafting and other technical applications. These pens provide the best line width control of all 4662 and 4663 pens. Wet-ink pens come in packages of 1 each, and a choice of three tip sizes is available. Replacement tungsten carbide tips may be purchased separately.

Generally, the larger the tip size, the faster you may plot with the wet-ink pen.

4662 Option 31, 4663 Interactive Digital Plotters

Tektronix offers plotting paper and film for a variety of applications. When used with Tektronix plotter pens, Tek-brand paper and film provides you with continually superior quality plotter output.

4662 Interactive Digital Plotter (B-Size) Plotter Paper

Blank Sheet Paper is recommended for presentations and reports.

Linear paper provides a square matrix graph.

Semi-log paper delineates logarithms along the horizontal axis with one-inch divisions on the vertical axis.

Full-Log paper graphs logarithms along both vertical and horizontal axes.

MONOCHROME COPIER PAPER

(A-size) Quick Dry Plotter Transparency Film

Use this specially coated transparent film for producing high-quality overhead transparencies. Results show virtually no pen strokes, streaking or puddling. The film resists fingerprints, and dries to the touch in seconds.

50-sheet package, 8.5 × 11 in.

006-5939-00 \$30.00

For best results, use film only with Tek Transparency Pens
(Page 4) **016-0469-XX**

4663 Interactive Digital Plotter (C-size) Polyester Film

Antistatic Polyester film is a good choice for plotter applications requiring reproduction or long storage. Polyester film shows little reaction to temperature or relative humidity, and is both waterproof and very stable. You can expect no discoloration or change in size over long storage periods. A variety of inks may be used, because the matte side of the polyester will accept most inks that do not flow well on the smooth side.

Antistatic Polyester Film

17 × 22 in., 100 sheets

006-2835-00 \$120.00

(C-size) Plotter Paper

The 4663 uses two types of Paper: Translucent-bond, and Vellum 100% Rag Content.

Translucent-bond paper is available in either roll or 17 × 22 in. paper sheets. 4663 users may use roll paper only if they have the Paper Advance Option installed with their plotter.

Buying paper by the 2-roll package is a popular convenience. A roll of paper lasts much longer than single sheets — thus saving you reloading time.

Roll paper comes in two sizes: C-size (17 in. wide after tear off); and A2 Metric (420 mm or 16.5 in. after tear off).

Tektronix offers two types of hard copy paper for black and white copiers: Dry Silver and Dielectric paper. The paper you select depends on the hard copy equipment you have.

Dry Silver Paper: Standard and High Performance

Both Tektronix-brand Dry Silver Papers (Standard and High Performance) provide at least 500 copies per roll. You can write on both types of paper with pencil or ballpoint pen — and erase pencil marks without damaging copy surface.

Note to medical ultrasound users

The 4635 Imaging Recorder (or upgraded 4633A) will use either High Performance or Standard Dry Silver Paper.

4631, 4632 Hard Copy Units, and 4635 Imaging Recorder

Standard Dry Silver roll paper reproduces a high quality image for complex graphics and alphanumerics. Use this paper for applications requiring less than 10 levels of gray scale.

Buying Standard Dry Silver paper by the 4-roll carton is a popular convenience that saves you money and frequent reordering.

4633A, 4634, 4635 Imaging Recorders

High Performance paper is used for imaging requiring at least 10 levels of gray scale, as well as ultrasound diagnostic recordings.

Buying High Performance Dry Silver paper by the 4-roll carton is a popular convenience that saves you money and frequent reordering.

20+ cartons (15% savings)
Per Carton (\$159.38 per roll) **\$637.50**

Note regarding Dry Silver Paper Storage:

Paper storage is important for retaining exposure sensitivity. If the paper is stored in its original package at 22°C (72°F) and more than 50% humidity, the paper may lose up to 1 f-stop in sensitivity during one year. However, the paper may be refrigerated or frozen with little or no loss of sensitivity. It is necessary to acclimate refrigerated or frozen paper for 24 hours prior to use to prevent condensation of atmospheric moisture.

4611, 4612 Hard Copy Units

Only Tektronix Dielectric Hard Copy Paper is recommended for producing high quality copies with the 4611 and 4612 Storage and Video Display Copiers. Copies are completely archivable and can be annotated with any kind of pen or pencil. Each roll provides at least 500 copies.
